Brand Highlight

A Closer Look at U.S. Cosmetics

HAUS LABS  
BY LADY GAGA

Haus Labs closed September with an impressive \$14.3M EMV. Founded by superstar Lady Gaga, the cruelty-free brand made waves thanks to the release of its new Triclone Skin Tech Hydrating Concealer. The product, which boasts a wide array of shades, amassed \$1.3M EMV via 131 creators. Haus Labs partnered with Sephora to show off the concealer, which purportedly "blurs, brightens, conceals and visibly de-puffs." Makeup lovers like Nikkie de Jager (@nikkietutorials on TikTok) hyped up the product for \$153.0k EMV. Meanwhile, beauty creator Lindsey Rowley (@linsmakeuplooks) drove the most conversation for the brand online, powering \$2.9M EMV, or 20% of Haus Labs' monthly total. Lindsey's 45 posts featured wide-ranging content including musings on jaw surgery, bat makeup, and looking "like an English bulldog." But Haus Labs' success wasn't confined to this product launch: the concealer is considered "the little sister" of a broader line that includes the Triclone Skin Tech Medium Coverage Foundation, which powered \$3.9M EMV. Overall, these offerings helped inspire a 70% MoM EMV improvement for Haus Labs.

# What is EMV?

Earned Media Value, or EMV, quantifies the estimated value of consumer engagement with digital earned media. Our holistic approach assigns a unique value to a piece of content based on the platform it was published on and engagement received from followers and consumers. This value is then attributed to the specific brands mentioned within the post. EMV can be used to evaluate the earned performance of individual marketing campaigns and benchmark brands within the competitive landscape.

## Glossary of terms

### Community Metrics

- Community Size**  
The total number of creators who authored content about a brand within a given time period.
- Posting Frequency**  
The average number of posts authored per creator for a brand within a given time period.
- Creator Potency**  
The average amount of EMV driven per creator for a brand within a given time period.

### Creator Tiers

- Powerhouse Creator**  
Creators with over 1M followers on their primary channel.
- Established Creator**  
Creators with 300k to 1M followers on their primary channel.
- Mid-Tier Creator**  
Creators with 100k to 300k followers on their primary channel.
- Micro-Creator**  
Creators with fewer than 100k followers on their primary channel.

### Others

- Sponsored EMV**  
A post is labelled “sponsored” if it contains hashtags or language that denote a sponsorship, such as “#ad” or “#spon.”
- Engagements**  
The total number of likes, comments, and shares that content about your brand received.
- Reach**  
The total follower count of the creators who mentioned your brand.
- Impressions**  
How many times content about your brand was viewed by your creator community’s followers.
